

Powerful market platform. Simplified broker experience.

Nexben is leading a truly radical marketplace transformation by creating the first ever end-to-end technology platform. The cloud-based platform connects the entire health insurance industry bringing administrative efficiencies, scalable processes, greater cost control and transparency required for growth in the complex world of benefits.

One simple platform for everyone.

Carriers, insurance brokers, employers and employees can easily and seamlessly interact in real-time.

- Brokers can dynamically generate multi-carrier quotes and proposals, providing the transparency needed to engage with clients and help them control costs — driving more business.
- Employers are fully equipped to compare all available health plans and select a complete benefit package that satisfies both employees and the bottom line.
- Employees and individuals can independently shop, compare and enroll in any available health plans in their market — easier and faster than any other exchange.
